

UI & GRAPHIC DIGITAL DESIGNER for an International business/digital transformation agency

We are an international agency highly specialized in digital transformation and business growth for tech companies looking to leverage their business in the Cloud.

Digital technologies are evolving at a high-pace never seen before and we strive to give every business the opportunity to grow and build their digital DNA. We assist top-notch technology companies worldwide through agile B2B digital marketing services and Cloud enablement to speed up their digital shift, reshape themselves and put new structures and strategies at their core.

We are now significantly expanding our team and we are looking to complete our digital team with an **experienced and ambitious UI & Graphic Digital Designer**. You would be joining a talented, multicultural team that strives for excellence in every facet of the projects we work on.

If after reading below you think you're the right person, we want to hear from you!

Summary of the Role and Daily Tasks

The **UI & Graphic Digital Designer** will be responsible for supporting the execution of web and graphic design projects, both internally and for our client portfolio. The ideal professional should be comfortable navigating between the two, meeting deadlines while handling multiple projects and accounts.

The scope of work for **web projects** goes from wireframe development to design composition to interfacing with development team, conceptualizing original ideas that bring simplicity and user friendliness to complex design roadblocks. For **graphic design**, it includes creative design and design adaptation, focusing primarily on creating assets for digital campaigns, typography, brochures, images and other forms of digital content designs.

Team collaboration and accountability are key. In addition to a **superior design experience**, you must have strong written and verbal communication skills with the ability to communicate clearly with all teams involved and clients. This position requires someone who is goal driven, can manage their time wisely and is organized.

You should have a unique **blend of design, technical and business advanced skills**, as well as creative savvy. You are a detail-oriented self-starter, able to meet tight deadlines with flawless execution. You strive to stay on top of trends in the design and technology world and are always seeking for that extra edge. Problem-solving is in your nature.

Job Requirements:

- Proven experience in design, development or prototyping experience.
- Must have a strong design portfolio to present for review.
- Solid experience in creating wireframes, storyboards, user flows, process flows and site maps.

- Proficiency with Adobe Creative Cloud (Photoshop, InDesign, Illustrator), as well as OmniGraffle, Axure or other visual design and wire-framing tools.
- Proficiency in HTML, CSS, and JavaScript for rapid prototyping.
- Strong visual design sense and skills, with sensitivity to user-system interaction.
- Up-to-date with the latest UI and Graphic trends, techniques, and technologies.
- Experience working in an Agile/Scrum development process.
- BS/MS in Design, Human-Computer Interaction, Interaction Design, or related, is a plus.

Your Experience and Qualities:

- Fluent in written and spoken English (native or fluency at a bi-lingual level). This is a must, as you will be working with an English-speaking audience. Other major European languages are a plus.
- Self-motivated and self-learner, with an enthusiasm for the web industry and emerging technologies.
- Critical thinking and ability to solve problems creatively and effectively.
- Goal oriented, with the positive attitude and high energy.
- Strong project management skills and ability to deliver high-quality work with attention to detail.
- Confidence to pitch your ideas in public and ability to present your designs and sell your solutions to various stakeholders.
- Design background in Marketing and Business Technology industries is a plus.

What's in it for you?

- International trajectory: Working for a local company who thinks and acts globally.
- Working with leaders: Get used to interacting with “top notch” global technology companies.
- Innovative culture: Freedom to create, execute your ideas and make great things happen.
- Awesome atmosphere: Dynamic and creative working environment (frills included).
- Opportunities to grow: Take on responsibilities and get real-life on-the-job personal and professional development.
- Flexible work hours: Results are what matter.
- Compensation based on your performance and client satisfaction

How to Apply?

- Please submit your application via email.
- To start immediately or as fast as you can.
- Include one-page CV in English (required) and your design portfolio. (Note: We want to see your work. Applicants without portfolios will not be considered).
- This is an in-house position, based in Ljubljana, Slovenia. Working EU visa is a must (we don't sponsor). Overseas applicants must prove their eligibility to work in EU to be considered.
- Add a tweet phrase about why would you like this job or a short motivation letter.
